How to make your Halloween Fairy Pop-Up Scene

1. Cut out the whole scene
Cut around the outside edge of the scene and both triangles, keeping everything as ONE connected piece.

2. Cut the centre slit
Cut up the centre line between the two triangles, starting at the bottom point. Stop when you reach the bottom edge of the scene.

3. Fold and make the floor
Fold along the horizontal line where the scene meets the triangles, then fold the scene along the vertical centre line to form a corner. Fold the triangle marked GLUE underneath the floor triangle and glue it in place.

4. Prepare the stand-up strip
Cut out the fairy and pumpkins with the whole strip as ONE piece. Fold along the dotted line, keeping the fairy and pumpkins upright.

5. Attach the stand-up strip
Apply glue to the BACK of the bottom strip, then stick it underneath the floor triangle. Keep the fairy and pumpkins upright at the front of the scene.

Finished! Your Halloween Fairy Pop-Up Scene is ready to display.
